REWARDS CODE

TRHTXYGJCX

*Reward (rebate) request must be submitted within 60 days of purchase. ACUVUE® Rewards are only valid on in-office purchases and purchases made at participating retail locations. Rewards are not valid for internet purchases or purchases made at Costco® Optical, Sam's Club® Optical, BJ's® Optical, Walmart® Optical or Target® Optical, but other offers may be available for ACUVUE® Brand purchases at these retailers. Recent eye exam required. See complete Terms & Conditions and annual supply quantities on back and at MyAcuvueRewards.com.

Important information for contact lens wearers:

ACUVUE® Brand Contact Lenses are available by prescription only for vision correction. An eye care professional will determine whether contact lenses are right for you. Although rare, serious eye problems can develop while wearing contact lenses. To help avoid these problems, follow the wear and replacement schedule and the lens care instructions provided by your eye doctor. Do not wear contact lenses if you have an eye infection, or experience eye discomfort, excessive tearing, vision changes, redness or other eye problems. If one of these conditions occurs, remove the lens and contact your eye doctor immediately. For more information on proper wear, care and safety, talk to your eye care professional and ask for a Patient Instruction Guide, call 1-800-843-2020 or visit Acuvue.com.

* Helps protect against transmission of harmful UV radiation to the cornea & into the eye.

WARNING: UV-absorbing contact lenses are NOT substitutes for protective UV-absorbing eyewear such as UV-absorbing goggles or sunglasses because they do not completely cover the eye and surrounding area. You should continue to use UV-absorbing eyewear as directed. NOTE: Long-term exposure to UV radiation is one of the risk factors associated with cataracts. Exposure is based on a number of factors such as environmental conditions (altitude, geography, cloud cover) and personal factors (extent and nature of outdoor activities). UV-blocking contact lenses help provide protection against harmful UV radiation. However, clinical studies have not been done to demonstrate that wearing UV-blocking contact lenses reduces the risk of developing cataracts or other eye disorders. Consult your eye care practitioner for more information.
